Art Unit: 1743

## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35 and 41-47, drawn to a microfluidic flow guiding apparatus and a method for using the apparatus, classified in class 422, subclass 100.
- II. Claims 36 40, drawn to a process of making a microfluidic flow guiding apparatus, classified in class 438, subclass 694.
- III. Claims 48 51, drawn to a process of making a microfluidic flow guiding apparatus using photolithography, classified in class 438, subclass 708.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (see MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process. For example, the apparatus can be made using other known microfabrication techniques, such as wet chemical etching, photolithography, laser ablation, air abrasion, injection molding, or embossing.

Inventions I and III are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (see MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process. For example,

Application/Control Number: 10/071,846

Art Unit: 1743

the apparatus can be made using other known microfabrication techniques, such as wet chemical etching, laser ablation, air abrasion, injection molding, or embossing.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions have different modes of operation. For example, invention III specifically recites the use of photolithographic techniques.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Harry C. Engstrom on 11/5/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1743

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Sines, Ph.D. whose telephone number is (703) 305-0401. The examiner can normally be reached on Monday - Friday (11:30 AM - 8 PM EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on (703) 308-4037. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9310.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
